

Coated Aluminium for Semi-rigid Packaging

Italcoat supplies **coated aluminium** to manufacturers of trays, containers, tealights and lids. Our foil is subject to **accurate quality controls** according to the **GMP** (Good Manufacturing Practices) of all European regulations for food contact materials.

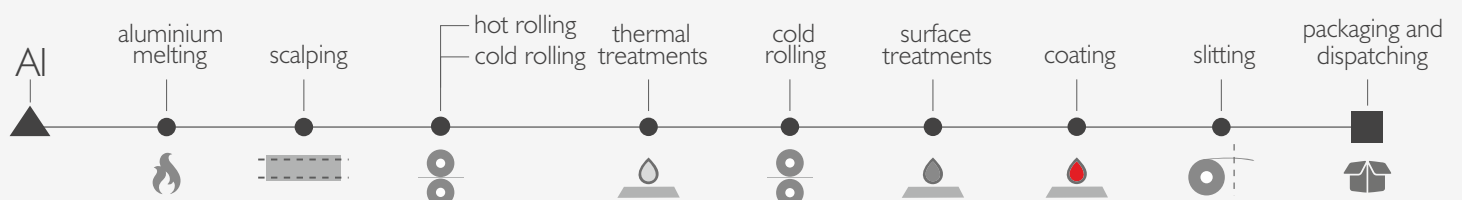

Upon request, coating could be **BPA N.I.A.** (“Bisphenol A - Not Intentionally Added”) and/or PVC Free.

We care about **sustainability**

We continuously improve the **resource optimization** to increase production efficiency. We work hard to **reduce consumption** of water, energy and paper; to **control and limit emissions**; to **effectively manage harmful substances and waste**.

How we manufacture **coated aluminium** coils for semirigid packaging

Alloys and Applications

8XXX - H24
Wrinklewall

8XXX - H22
Smoothwall

3XXX - soft
Ovals & Platters

8XXX - soft
Airline lidding foil

8XXX / 3XXX - soft
Airline casseroles

3XXX - soft
Dessert cups & Tealights

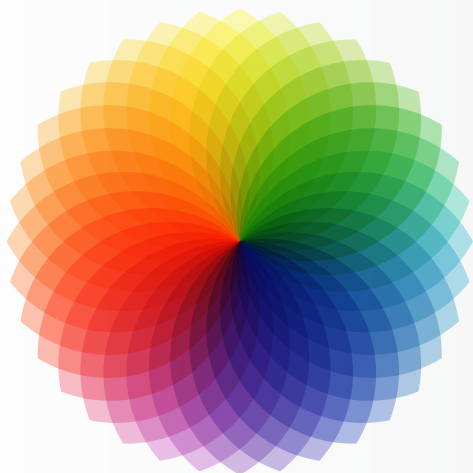

Chemical degreasing and pre-treatments guarantee perfect adhesion of coating

Coated aluminium is essential to contain food with an aggressive pH or high salinity.

Coating enhances the aesthetic identity of containers and trays: personalisation and quality augment the visual experience of consumers.

Our foil can be provided with heat sealing lacquer and with non-stick coating.

All colours are available, upon request.

All lacquers can be provided in the **opaque**, **semi-opaque**, **bright**, **semi-transparent** and **transparent** version.
