

Coated Aluminium Foil **PVC-free range**

IPS developed an innovative **PVC-free coated aluminium** to be used in the manufacturing of:

PROCESSED CHEESE
PACKAGING

COFFEE LIDS

DAIRY PRODUCTS
LIDS

CHOCOLATE
PACKAGING

Foil is suitable for any packaging machine and customizable with logo

keep up with
sustainability

high-performing

as pvc-based coated aluminium

compliant

with all major sustainability regulations

greener solution

to minimize environmental impacts

Why choose
PVC-free
Coated
Aluminium?

This innovative solution confirms our commitment to a greener future, minimizing environmental impact and ensuring a safe and sustainable product.

Our PVC-free range meets the growing **demands for environmentally friendly materials** and **ensures compliance with increasingly stringent environmental regulations**. Tests confirm our PVC-free coated aluminium keeps the same characteristics and performance as the PVC-based one.

main advantages

of PVC-free coated aluminium foil

Extended product's shelf life

Highly customizable

Total protection against light, moisture, oxygen and gas

Excellent corrosion resistance

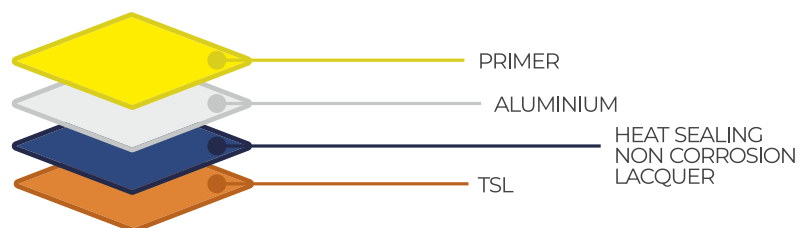

PVC-FREE COATED ALUMINIUM FOIL FOR PROCESSED CHEESE PACKAGING

THICKNESS: 12μ

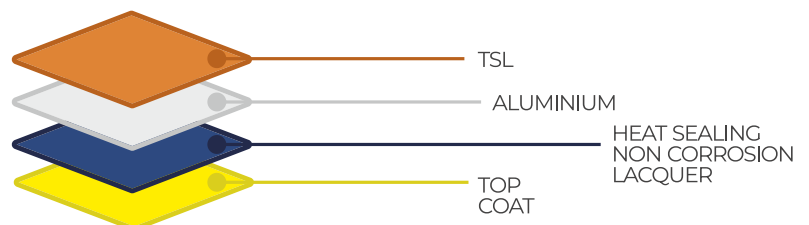

SURFACE: flat or embossed

STRATIGRAPHY:

SHELL

LID
