

Full PVC-free system for aluminium coffee capsules

Fully Integrated Supply Chain

From Raw Material to Finished Capsule: A Complete PVC-Free System

Our greatest strength lies in our fully integrated production cycle, managed within the Laminazione Sottile Group. We provide end-to-end, control across every phase of the manufacturing process, delivering a seamless, 100% PVC-free solution for both the capsule body and the top lid.

Raw Material

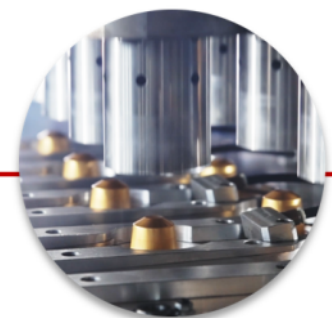

- Quality control on raw material
- Flexibility in alloy selection and mechanical properties

Coil Coating

- Complete control of the lacquering process
- Centralized R&D

Capsules / lid

- Complete coffee capsule production
- Preliminary control of capsule performance

HIGH-PERFORMING
as pvc-based coated aluminium

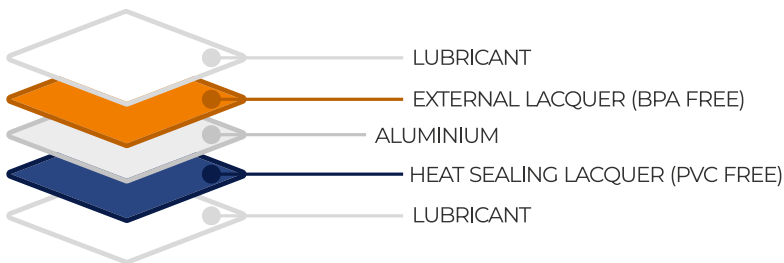

COMPLIANT
with all major sustainability regulations
